

LESSON 23

Warm-up

You can teach your school buddies how to draw. It's fun! Be sure to follow the key words and the lessons outlined in this book. Remember that each component is important to the lesson as a whole. From the Warm-ups to the Drawsheets, each has a specific purpose in strengthening your drawing skills. Warm up with one minute of Drawercize, then flip through your sketchbooks to see your progress from Lesson 1 to Lesson 23.

Key Drawing Word: **Advanced Shading**

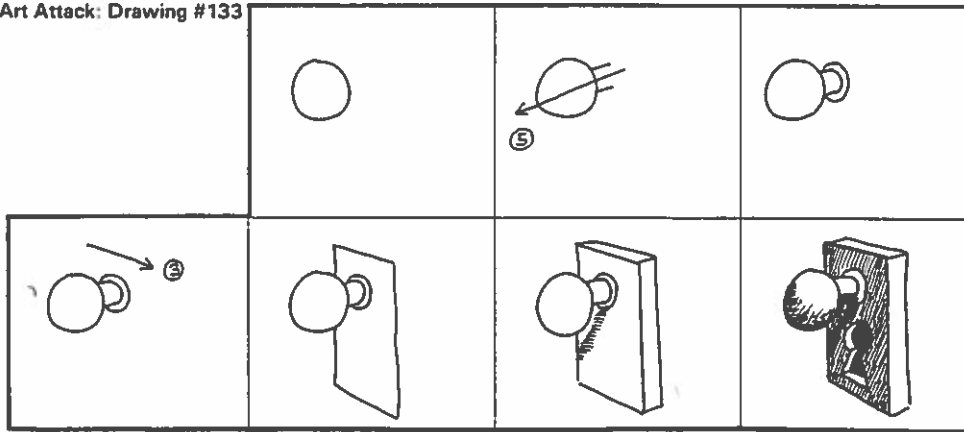

SHADING: The filling in of shadows (those dark areas away from light sources.) There are several different ways of representing shadows: by drawing lines around the edge of an object away from the light source, by increasing the concentration of lines, either parallel or perpendicular (as in crosshatching), or by increasing the density of dots as they recede from the light source (stippling).

Mike Schmid, Art Teacher, Haverhill Elementary School/Fort Wayne, IN

Create your own key word symbol for **shadow**
