

LESSON 19

Warm-up

We're way over 100 drawings now...yayh! Great job! Loosen up with 120 seconds of Drawercize. Do you get embarrassed and hide your hands under the table when you warm up while nonchalantly looking around to see if anyone is watching? C'mon you drawing maniac, wake up! You're an artist. You don't have to worry about what people think. We have a creative license to act as "artsy" as we want. If you feel an art attack bubbling to the surface, don't worry if your friends are watching. Get them to join you! Is this a great planet or what!

Key Drawing Word: **Intermediate Attitude**

ATTITUDE: To create any artistic endeavor the artist must have enough self-confidence to offer his work to others for their consideration. The ability to feel good about your work must be developed through personal awareness of your talent, technique and creativity. This comes with the daily practice of basic elements which make up the background the artist draws upon to create his work. When the person feels good about himself, the work flows freely. Creativity is enhanced and the fear of criticism diminishes.
